

TriVac® Series

»»» Pressure Cleaners

PATENTED AQUADRIVE® TECHNOLOGY
FOR A THOROUGH YET GENTLE CLEAN

CLEAN ON A WHOLE NEW LEVEL.

Patented extra-large debris bag with unique float carries more without getting dragged down

Easy-access dial provides a choice of Skimming Top or Bottom/Wall cleaning modes.

Powerful sweep hose improves coverage by stirring up debris in hard-to-reach areas

Wide vacuum inlet works in concert with three high-pressure venturi jets to pick up larger debris

Low-friction wheels eliminate wear-and-tear on pool surfaces

With two powerful cleaning modes, TriVac® 700 has your pool covered.

TriVac 700 is the only pool cleaner that can skim debris from the surface of the water or thoroughly vacuum the floor, walls and coves. Simply turn the dial to select either Skimming Top or Bottom/Wall mode, and enjoy the results you want, when you want them.

THE MOST COMPLETE CLEAN

With its patented skimming feature, TriVac 700 is the only cleaner that captures debris on the surface of the water as well as the floor and walls.

GENTLER ON POOL SURFACES

Patented AquaDrive® technology uses powerful water jets to propel the cleaner forward, providing superior coverage that won't harm your pool's finish.

FASTER, MORE EFFICIENT OPERATION

A unique short back-up sequence allows TriVac 700 to quickly and easily maneuver around obstacles, spending more time cleaning and less time turning.

TRIVAC® 500

Don't need to skim the surface of your pool? Try TriVac 500. Built with the same powerful features as TriVac 700, minus the skimming capability, it provides complete coverage of your pool's floor, walls and coves with flawless results every time.
